

# Sabre Tooth Double Trouble

The Sabre Tooth Tiger at the entrance to the Zoology department has two huge fangs (canines) – that's double trouble!

So that means two challenges for you... **First**, can you find your way from start to finish on the black lines?

**Second**, can you colour him in to make him even more scary? If you make the areas with a dot dark brown, other areas very pale brown and the teeth yellow he will look much more realistic!
